

# A family guide to MAP Growth

Children learn better—and faster—when teachers have a clear picture of what each student knows and is ready to learn next. That's why a group of educators and researchers founded NWEA®, a not-for-profit organization that has created some of the most trusted and reliable assessment solutions available. More than 11 million students in the US and in 140 countries worldwide use MAP® Growth™.

## How it works

MAP Growth is a computer-adaptive test. If your child answers a question correctly, the next question is more challenging. If they answer incorrectly, the next one is easier. This type of assessment challenges top performers without overwhelming students whose skills are below grade level.

MAP Growth begins with a question at each student's grade level and adjusts the level of difficulty based on individual performance.

## What it measures

MAP Growth uses a RIT scale to accurately measure what students know, regardless of their grade level. It also measures growth over time, allowing you to track your child's progress throughout the school year and across multiple years. Once your child completes a MAP Growth test, they receive a RIT score.

The RIT scale precisely measures student performance, regardless of whether they're performing on, above, or below grade level.
